After the success of their **Channel U - Best of British** nominated 'Keep Holding On', UK urban collective **Nu:Starr** come with their hot new release 'Candi Treat'

RnB producer **Kayo** produces the single's urban cut and for the dancefloor there's an explosive remix from the UK's top breakbeat personality, **Angel Farringdon**.

Early support has come from both side of the water with top US Breakbeat tastemaker **DJ Icey** giving the Angel Farringdon version a whole lotta spins stateside whilst in the UK, Jay Cunning has recently dropped it on his Kiss FM show.

Original members **Milen Yonas** and **Adiam Teckle** (AKA **Angel**) met in Sweden's capital Stockholm whilst still at primary school and have been performing together ever since. These two unique and individual talents naturally fuse together to create the Soul and Rap experience that is **Nu Starr**.

The girls see **Nu Starr** as the vehicle through which they can achieve their personal aim to touch and inspire as many people as possible through their music, and are currently putting the final touches to their debut album due for release in 2007.

Their live performances are something not to be missed either. They've recently performed alongside top urban artists such as **Omar** and **Nate James** throughout the UK at festivals like the **Rise Festival** in London and the **Birmingham Carnival**. Shows in Greece and East Africa are next up on this up and coming band's busy schedule.

**"Listen up people, there's a Nu Starr rising"**
